

WRF-400

With a combination of both softening resin and activated carbon, the Origins Model WRF-400 addresses a number of water quality issues in one device.

Through ion exchange, calcium and magnesium is removed creating softened water for the benefit of both you and your homes' appliances.

In addition, the reduction of a broad range of organics, as well as many objectionable taste and odor characteristics are addressed by adsorption with an exclusive blend of activated carbon. Using proven electronic controls and a robust ceramic disc valve, this hands-free system offers years of maintenance free operation.

Two Tanks - One Control
Saves Money and Water

FEATURES

- Fully ported twin series electronically valve affords fully automated, metered functionality
- Accommodates any type of plumbing
- Robust 10% ion exchange resin for years of service-free operation
- Catalytic Carbon suited for a broader range of organic compounds
- An innovative ceramic core control valve design for smooth, dependable operation

BENEFITS

- Softened, iron free water from every faucet in your home
- Eliminates particulate such as sand, rust, and other sediment
- Carbon technology used in the reduction of chloramines, PFAS, and many other contaminants
- Metered demand controls to reduce operating costs
- Better tasting water, coffee, tea, and other beverages made from tap water
- Significant reduction of soap and cleaning products cost

SPECIFICATIONS

- Twin series electronic control valve with robust ceramic core construction
- Fully automatic, meter initiated electronic controls
- 2 NSF certified 10" x 54" FRP media tank
- 1.5 cubic ft. of 10% resin and 1.5 cubic ft. of catalytic carbon
- Ample salt storage with grid shelf and safety float
- Service flow rate of over 10 gpm
- In/Out 1" plumbing connections
- Operating pressure up to 110 psi and temperature range of 34° to 110°F
