

WRF 150

With a combination of both softening resin and activated carbon, the Origins Model WRF-150 addresses a number of water quality issues in one device. Through ion exchange, calcium and magnesium is removed creating softened water for the benefit of both you and your homes' appliances. In addition, the reduction of a broad range of organics, as well as many objectionable taste and odor characteristics are addressed by adsorption with an exclusive blend of activated carbon. Using proven electronic controls and a robust ceramic disc valve, this hands-free system offers years of maintenance free operation.

FEATURES

- Fully ported electronic valve affords fully automated, metered functionality
- Accommodates any type of plumbing
- Robust ion exchange resin for years of service-free operation
- Activated carbon suited for a broader range of organic compounds
- An innovative ceramic core control valve design for smooth, dependable operation

BENEFITS

- Softened, iron free water from every faucet in your home
- Eliminates particulate such as sand, rust, and other sediment
- Carbon technology used in the reduction of chloramines, PFAS, and many other contaminants
- Metered demand controls to reduce operating costs
- Better tasting water, coffee, tea, and other beverages made from tap water
- Significant reduction of soap and cleaning products cost

SPECIFICATIONS

- Sales Number: 00781
- Electronic control valve with robust ceramic core construction
- Fully automatic, meter initiated electronic controls
- NSF certified 10" x 54" FRP Media Tank
- Brine Tank 16" x 33"
- 1 ft³ cation exchange resin; 0.5 ft³ Tri-Duty activated carbon
- Ample salt storage with grid shelf and safety float
- Service flow rate of over 10 gpm
- In/Out 1" plumbing connections
- Operating pressure up to 110 psi and temperature range of 34°F to 110°F

5-Stage Water Refinement

REFINEMENT PROCESS

STAGE 1: GRANULATED ACTIVATED CARBON

Removes and reduces Chlorine used by the city to kill bacteria, while removing foul odors and taste.

STAGE 2: SOFTENING

Ultra high-capacity, commercial grade 10% cross-link resin softens the water to zero hardness.

STAGE 3: NEUTRALIZATION

Calcite adjusts the pH of mildly acidic incoming water.

STAGE 4: 4 FILTRATION

A highly efficient media of aluminum silicate filters incoming water, removing suspended solids not visible to the naked eye.

STAGE 5: CLARIFICATION

Silica/Quartz base polishes the water to a sparkling clarity while ensuring even distribution.

EXCLUSIVE ELECTRONIC DIGITAL CONTROL VALVE:

- Electronic back-lit display
- No gears to break
- Automatically calculates:
 - Usage
 - Capacity
 - Reserve volume
- Eliminates mechanical & cable
- Motor only runs during regeneration
- High flow rates for steady performance when multiple faucets are in use
- Knows how much water is used and when
- Simple set time of day and hardness

The First Name in Healthy Homes®

From 1924 through the turn of the century, we were Electrolux, the clear leader in home cleaning throughout North America.

Now, we're Aerus, a new name for a new generation of products and services designed to help make your home a Healthy Home. All backed by performance so legendary, over 99.8% of our customers recommend Aerus to their friends and family.
